Claims 1 to 35 are pending in the instant application.

Claims 1 to 35 are generic to a plurality of disclosed patentably distinct species of first and second GPCRs as listed in Figures 3 to 6, first and second cells as listed in paragraphs 00112 and 00113, first and second markers as listed in paragraph 00116, and first and second proteins associated with the desensitization pathway as listed in paragraph 00115. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of first GPCR, second GPCR, first cell, second cell, first marker, second marker, first protein associated with the desensitization pathway, and second protein associated with the desensitization pathway, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
